Community Outreach Ministries (COM) has partnered with Computer Recycling Center (CRC) to provide a means for Polk County to easily and securely dispose of old electronics. E-scrap may be dropped off inside COM's thrift store any time the store is open.

In addition to recycling old devices, appliances, batteries, & bulbs, **data-containing devices** (computers, cell phones, tablets, CDs, flash drives) are sent to CRC to be destroyed, ensuring that your personal information remains private.

CRC is AAA certified by the National Association for Information Destruction (NAID). They are also an R2 Responsible Recycling Certified by the EPA. You can find out more about CRC's services on their website:
